IMT-2-PRO8-20

Course type

Module

Credits (ECTS)

10 ECTS

Language of instruction

Dutch

Study Year

Year 2

Offered by

HKU Media

Contact time (hours)

75

Self-tuition (hours)

205

Course information

Content 1

In project 8, you will work with a number of fellow students on a spatial video/media installation.

Important aspect of this installation is the role/position of the visitor/spectator/participant in this space.

Experimenting with exploratory and/or constructive interaction (in the broadest sense of the word) therefore plays a major role in this module.

In addition to support in the areas of concept development and production, the teaching team provides

- technical and architectural support
- collaboration and group dynamics support.
- repertoire knowledge of the discipline in which you will be working.

You yourself are responsible for:

- a process based on research, iterations, intermediate products and experimentation (which you carefully record)
- your own focus within the partnership (what role/roles do you want, have and take?)
- a professional delivery of the final project

Learning objectives

After completing this module, you will be able to:

1. Produce a final work focused on spatiality, interaction and an 'active' audience.
2. Complete an iterative working process (of experimentation, material research, intermediate versions and prototypes and eventually a final work).

3. Dog context and repertoire research for the benefit of concept development and dissemination/communication.
4. Work collaboratively.
5. Communicate about and critically reflect on the design process and final work

Competences

Competences

- 01. Creative skills
-
- 03. Capacity for growth and innovation
-
- 04. Organisational skills
-
- 07. Ability to collaborate
-

Education forms

Information Instructional modes

Classroom instruction
Consultancy/Atelier visit
Coaching
Practicals
Lectures
Group discussions

Attendance / Participation requirement

Your own input, your development and the focus determined by you during and within the group process of project 8 is an important part of the assessment. It is therefore necessary that we meet you regularly (at work) and talk to you about your activities. In order to support and monitor you as well as possible, the lecturers expect you to attend all meetings. Of course, there may be circumstances that prevent you from attending. In case of one-off circumstances, please cancel by e-mail with the relevant lecturer. In case of long-term circumstances, we advise you to report to your tutor as soon as possible

Instructional modes

- Group lesson

Assessment criteria

Assessment criteria

1. The final work has accomplished its purpose; the 'construction' communicates what the student intends to communicate with the work and makes convincing use of space and interaction.

(ad learning objective 1)

2. The student has shown the ability to think and design in spatial constructions and knows how to divide and build up the design process clearly and logically.

(ad learning outcomes 1,2 and 5)

3. The final work is the result of thoroughly conducted research (both making practise research and source research)

(ad learning outcomes 2 and 3)

4. The student provides insight into the final work and its context (technical, content-related and design-oriented) in a concise yet stimulating and profound manner.

(ad learning outcomes 2, 3 and 5)

5. The student has acted as a professional designer within the partnership (ad learning outcome 4).

6. The student has established logical roles/contributions and focus for individual development (while maintaining an eye for group interests) and can reflect on them critically.

(ad learning outcomes 4 and 5)

Pass mark

All assessment criteria must be marked at least as Pass.

Tests

Lecturer / Committee Assessment

Committee Assessment

Explanation of tests

The following indicators are leading in the assessment:

Creative skills

1.1

1.2

1.3

1.4

1.5

1.6

1.7

1.8

Capacity for critical reflection

2.1

2.2

2.3

2.5

2.6

2.7

Capacity for growth and innovation

3.1

3.2

3.3

3.5

Organisational skills

4.1

4.2

Communication skills

5.1
5.4

Cultural and contextual awareness

6.2
6.3
6.4
6.7

Ability to collaborate

7.1
7.2
7.3

Tests

- Test 1

Assignment

Test weight

100

Minimum grade

A satisfactory result

Credits

10

Grading scale

Differentiated (VG, G, PASS, FAIL)

Lecturers

Lecturer

- R Lansink
- R Nijhof
