MUZ-2-SEM2B-18

Course type

Seminar

Credits (ECTS)

2 ECTS

Language of instruction

Dutch

Study Year

Year 2

Offered by

HKU Music and Technology

Contact time (hours)

12

Self-tuition (hours)

44

Course information

Content 1

Students collaborate with other disciplines in a so-called "high pressure cooker project" and have four feedback moments with the supervising teaching team (kick off – 2 work in progress meetings – final presentation).

Learning objectives

- 1) Students enrich their professional repertoire by experimenting with new methods, ways of working and knowledge sources.
- 2) Students are able to shape their own design process – possibly in collaboration with other disciplines.
- 3) Students can develop an assignment from a theoretical / artistic / technical / artisanal perspective into a result that meets predefined criteria.
- 4) Students are able to reflect on the (possibly multidisciplinary) design process, the final product and their own role or team role in the whole

Competences

Competences

- 05. Communication skills

The student interacts effectively in various professional contexts, using appropriate forms and means of

communication.

- 09. Project-based working
Organizing competences

Education forms

Information Instructional modes

Seminar / project

Attendance / Participation requirement

100% attendance

Explanation of education forms

Individual participation in a so-called "high pressure cooker project".

Instructional modes

- Group lesson
- Project

Assessment criteria

Assessment criteria

- 1) Explorative skills: Students can research the theme/subject associated with the profile and provide insight into the results.
- 2) Collaborative skills: Students are able to contribute to a joint (multidisciplinary) design process or that of another student.
- 3) Professional skills: Students use experience/expertise in delivering a final assignment that meets the criteria set and communicated in advance by the supervisory lecturer.
- 4) Reflective skills: Students can reflect on their own working process/final result, and can explain how what they have learnt contributes to their own artistic and professional development.
- 5) Self-management skills: Students can shape and document their own working process.

Pass mark

All criteria must be met to attain a pass.
