Course information

Content 1
Making a complete environment, from concept to composite with camera movement. The student produces a draft sketch, a 3D environment based on the sketch and a matte painting for the background. Various passes are then rendered and a camera movement exported to the compositing package. The scene is compiled in the compositing package.

Learning objectives
After this module, the student has gained an overview of how to create a complete shot from render to final product with compositing and colour correction, using various render passes.

Assessment criteria

Assessment criteria
At the end of the lesson, the student has produced 1 shot using various render passes, a matte painting and a camera movement in the compositing package.
The assessment focuses on the way the final shot relates to the concept and on the visual qualities of the shot. The shot is also expected to demonstrate professional technical skill.

Deliverable
A short clip of 10 seconds at 25 frames per second.

Tests

Lecturer / Committee Assessment
Both lecturer- and committee assessments (in case of multiple tests)
